**FOOD SAFETY LETTER OF ASSURANCE**

**Re: Food Safety at Ontario Plants Propagation Limited (Ontario Plants).**

Ontario Plants is certified by the Canadian Greenhouse Certification Program (GCP) administered by the Canadian Food Inspection Agency (CFIA). Ontario Plants operations exceed the pest and disease preventative and reporting standards set out by the CFIA. This is ensured by way of regular audits by the CFIA.

In addition to those requirements set out by the CFIA, Ontario Plants implements a very stringent and proprietary hygiene protocol for the prevention of bacterial and viral contamination. This protocol is the result of extensive consultation with knowledgeable experts on the topic of hygiene practices at plant propagation operations.

Mathieu van de Sande

CEO  
Ontario Plants Propagation Limited

Authorization Number / Numéro d'autorisation <b>CAN-GCP-0040</b>	
Serial No. / N° de série <b>000001</b>	
<p><b>United States – Canada Greenhouse-Grown Plant Certification Program</b>          The plants have been produced under the United States – Canada Greenhouse-Grown Plant Certification Program, are free from regulated pests, practically free from other injurious pests, and meet the phytosanitary import requirements of both Canada and the United States.</p>	<p><b>Programme États-Unis – Canada de certification des végétaux cultivés en serre</b>          Les végétaux ont été cultivés dans le cadre du Programme États-Unis – Canada de certification des végétaux cultivés en serre, sont exempts d'organismes nuisibles réglementés, pratiquement exempts d'autres organismes nuisibles, et répondent aux exigences phytosanitaires d'importation du Canada et des États-Unis.</p>
